Testimonial – GETA Young Scientist Program | Panel Member, Andhra Pradesh/Dr Karamala Pushpa (Panel Member since from 2023)

Dear GYS Team,

Greetings!

It is truly my privilege and pleasure to share my experience as a Panel Member representing Andhra Pradesh for the GETA Young Scientist Program since 2023.

Over these three wonderful years, I have had the honour of witnessing firsthand the remarkable curiosity, creativity, and problem-solving abilities of young innovators from across the region. Evaluating their projects has been nothing short of inspiring — the depth of thought these young minds bring to identifying real-world challenges and designing innovative solutions never ceases to amaze me.

The GETA Young Scientist Program is not merely a competition; it is a movement. It nurtures scientific thinking, builds confidence, and most importantly, ignites a passion for learning in children at the most formative stage of their lives. Programmes like this play a crucial role in shaping the future — not just of individual students, but of entire communities and generations to come.

I am particularly appreciative of my fellow Sri , Mr. Veliveti Murali, for his commitment and enthusiasm in making this initiative a meaningful experience for every participant.

Empowering young minds to think boldly, question deeply, and innovate fearlessly is one of the most important investments we can make in our society. The GETA Young Scientist Program does exactly that, and I am proud and grateful to be a part of this noble mission.

I wholeheartedly encourage every student, teacher, and parent to engage with this programme and make the most of the extraordinary opportunities it offers.

With warm regards and continued support,

Dr Karamala Pushpa
Panel Member – Andhra Pradesh
