

To,

The GYS Family

Subject: Appreciation letter on behalf of GYS Samasya Khoj 2026

Respected Sir/Madam,

I Kailash Chandra Hembram specially thanks GYS Family to give me honour to be part of their family. From being a part of their family, they recognised me for such honour to evaluate the projects of students across country.

While evaluating projects, I came over solution that these participating students are the upcoming geniuses. Some students are not only creative and genius but their observation over a little things is so sharp that many of us ignored. Their explanation over the what they observed and research shows their progressive steps towards future. I congratulate all the participants to be the part of this competition.

Once again I thanks GYS Family for conducting various competition like this and providing a national level platform to gather together all geniuses in one place. We need many platforms like GYS Young Scientist Program to develop the skills and intelligence and their implementation over real world.

Thank You,

Kailash Chandra Hembram
